PROJECTS

FNPF - Fiji National Provident Fund (FNPF). FNPF is one of the biggest financial institutions in the South Pacific island called Fiji.

1) myFNPF Mobile App, Fiji & Chennai.

Technical & Service design document, Development, Web Binding,

Database, Unit Testing & Deployment.

MARCH 2021 – PRESENT

Project Description : myFNPF is an mobile application for the members and pensioners to access their accounts(i.e, Profile, Balance, Transactions, Withdrawal, Employment, History maintained with Fiji National Provident Fund(FNPF). The myFNPF mobile app will allow the members to register the minor members under their account for voluntary contribution payments. myFNPF mobile app is integrated with few of the bank payment service, therefore the compulsory members can pay their additional contributions from this mobile app. The mobile app will also allow the members to communicate with the FNPF staff by sending messages directly to the FNPF staff regarding any requests, enquiries or complaints etc.

Achievements :

- One of the most downloaded mobile app on Fiji Island.
- Members withdrew their money during the COVID period through the COVID Assistance Application which was developed within a week.

Technologies Used : ASP .net, JSON, Ionic Framework, Angular JS, SQL Server, SQL Report server.

2) FNPF DrawDown Account, Fiji.

Requirement gathering, Technical specification document, Development, Web Design & Binding, Unit Testing, Database & Deployment.

JULY 2022 - FEBRUARY 2023

Project Description : FNPF DrawDown Account (DDA) is an internal-use product that offers members flexibility and earns an interest. DrawDown account allows members to receive a monthly income, access withdrawals and earn interest on their balances. DDA product is available only for FNPF members and their nominees, who qualify and is not for existing FNPF pensioners or annuitants. DDA holders will receive the monthly payment by monthly payment schedule and incur interest by interest batch schedule. DDA Holders are able to withdraw their money by partial or full withdrawal of their DDA balance.

Technologies Used : ASP .net, XML, SQL Report server, SQL Server.

3) FNPF Mobile App Configuration Management System, Chennai & Fiji.

Development, Web Binding, Unit Testing, Deployment.
